

VINTAGE SCUBA DIVER RELEASE OF LIABILITY  
IN ADDITION TO THE ORIGINAL LIABILITY

FOR THE PORTAGE QUARRY RECREATION CLUB INC.

I have been schooled in the hazards of diving with Vintage gear. I understand that appropriate safeguards must be taken. I understand there are Failure's in vintage gear. I have had my gear serviced within the last year. My log book and Vintage dives, I have made available to the Quarry. And current diving advances were not available when this gear was made. Using this Equipment without such items as Buoyancy Equipment, Pressure gauges, And Safe Seconds or octopus requires special training. All scuba tanks must abide by current DOT standards. We will not fill if not current and Quarry policy dictates no filling on site. I will be diving with a buddy at all times.

And understand that there are emergency ropes at strategic areas around the Quarry; these are to assist me in getting out of the water.

Or helping me to the surface. I have dove with this vintage gear before and have knowledge of the procedure. It does vary from any current agency teachings.
